## SUMMARY

AI/ML and Full Stack Developer with hands-on experience in building scalable web applications and AI-powered solutions using React.js, Node.js, Python, FastAPI, PostgreSQL, MongoDB, and Generative AI. Completed industry-focused projects including AI-powered automation and full-stack applications. Passionate about solving real-world problems through software development and eager to contribute to innovative engineering teams while continuously learning new technologies.

## EDUCATION

### Bachelor of Engineering (B.E.) in Artificial Intelligence and Machine Learning

Rajeev institute of technology

10/2023 – Present  
Hassan, Karnataka,  
India

- Pursuing B.E. in Artificial Intelligence and Machine Learning.
- Relevant coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Machine Learning, Cloud Computing.

### PUC

Master's PU college

05/2021 – 05/2023  
Hassan, Karnataka,  
India

## SKILLS

### Programming Languages

Python  
Java  
JavaScript  
SQL

### AI & Machine Learning

- Machine Learning
- Generative AI
- NLP
- TensorFlow
- Scikit-learn
- Hugging Face

### Tools & Platforms

- Git
- GitHub
- Docker
- Vercel
- Render
- VS Code
- Postman

### Web Development

- React.js
- Node.js
- Express.js
- HTML5
- CSS3
- REST APIs

### Databases

- PostgreSQL
- MongoDB
- Prisma ORM

## LANGUAGES

- English
- Kannada
- Hindi

## PROJECTS

---

### Queue Management System [🔗](#)

06/2026 – 07/2026

*React.js • Node.js • Express.js • MongoDB • Socket.IO • JWT*

- Developed a real-time queue management system to streamline customer registration, token generation, and live queue tracking.
- Built a responsive frontend using React.js and implemented secure REST APIs with Node.js and Express.js.
- Integrated MongoDB for persistent data storage and implemented JWT-based authentication for secure user access.
- Used Socket.IO [🔗](#) to enable real-time queue status updates between users and administrators.

### Automated Outreach Pipeline [🔗](#)

05/2026 – 06/2026

*Python • Generative AI • APIs • Automation • Email Workflow*

- Developed an AI-powered outreach automation pipeline to generate personalized emails and streamline lead outreach workflows.
- Integrated Generative AI to create context-aware email content, reducing manual effort and improving communication efficiency.
- Built a modular Python-based pipeline with API integrations for lead processing, content generation, and automated workflow execution.
- Designed the system with reusable components to support scalable outreach campaigns and simplify future enhancements.

### Solar Panel Degradation Predictor [🔗](#)

05/2026 – 06/2026

*Python • Machine Learning • Data Analysis • Predictive Modeling*

- Developed a machine learning model to predict solar panel degradation using historical performance and environmental data.
- Performed data preprocessing, feature engineering, and model training to improve prediction accuracy and reliability.
- Evaluated multiple machine learning algorithms and optimized model performance using appropriate evaluation metrics.
- Built a scalable prediction pipeline to support proactive maintenance and improve long-term solar panel efficiency.

### Accredian Enterprise Clone [🔗](#)

07/2026 – 07/2026

*React.js • TypeScript • Node.js • REST APIs • Responsive UI*

- Developed a responsive enterprise web application by recreating the core functionality and user interface of the Accredian platform.
- Built reusable React components with TypeScript to create a scalable and maintainable frontend architecture.
- Integrated REST APIs to enable dynamic data handling and seamless interaction between the frontend and backend.
- Implemented responsive layouts and optimized the user experience across desktop and mobile devices.
